- Redux

Projects

Reylink
(https://reylink.com - https://github.com/Venom-Hunters/Connection)
An app oriented to the business meeting, that allows you to chat and keep log of the conversation, using React, and webRTC.

Notes
(https://github.com/ReyPena/notes-personal-project)
An app that allows you to record and store information all in one place, using a full MEAN stack and libraries in to allow functionality (codemirror, and summer note).

Card game
(http://card-match.herokuapp.com/ - https://github.com/ReyPena/Jquery-memory-game)
A game who's purpose is to make matches and remove cards in as few moves as possible. I used jQuery, HTML, and CSS to create it.
